

## Using CSS

### Objective

Use CSS and industry editor (Dreamweaver) to modify pages for web viewing & navigation.

### NetStorage via FTP

1. At home, start up your File Transfer Protocol software (Fetch, CoffeeCup, CoreFTP, etc.) and Log into your NetStorage account using the host name, username, & your password.
2. On a campus computer, open your NetStorage drive from the desktop
3. On NetStorage, locate the **website** folder created in lab #1 and copy/move the **labs** folder from your NetStorage account onto the *Desktop*.
5. File structure on *Desktop* **labs** folder should now look like this:

```

labs
  images
    superheroImage.jpg
    yourPhotoImage.jpg
  lab1
    360_lab1.pdf
    lab1.html
  lab2
    360_lab2.pdf
    lab2.html
    myPhoto2.html
    superhero2.html
  lab3
  
```

### Files - Moving, Duplicating & Renaming

1. Place the **360\_lab3.pdf** into the **lab3** folder inside the **labs** folder on *Desktop*
2. Duplicate and copy all HTML files from inside **lab2** folder and place into **lab3** folder
3. Rename **HTML files** inside lab3 folder to reflect example below
4. File structure on *Desktop* **labs** folder should now look like this:

```

labs
  images
    superheroImage.jpg
    yourPhotoImage.jpg
  lab1
    360_lab1.pdf
    lab1.html
  lab2
    360_lab2.pdf
    lab2.html
    myPhoto2.html
    superhero2.html
  lab3
    360_lab3.pdf
    lab3.html
    myPhoto3.html
    superhero3.html
  
```

# Example - finished lab 3 @ <http://studentweb.ewu.edu/username/>

## Planning the Design

1. It is common to sketch a design layout using boxes as placeholders for group elements. Look at finished samples below to see page design structure.
2. Using HTML and eventually CSS, we apply <div> tags to identify each boxlike structure/placeholder of the design. Name each <div> according to its purpose using an ID name.
3. Once the <div> tags are in place, identify the styles or design properties and values for each <div>

## Dreamweaver Text Editing - lab3.html

1. Edit the following **bold** red tags, text and commented areas. This was your old `lab2.html` and not all content properly reflects the lab 3 assignment. Use Dreamweaver's Split view, Property panel, and the Insert panel.

```
<!DOCTYPE html>
<html>
  <head>
    <!--This is a comment. Comments are not displayed in the browser.-->
    <!-- modify each content="" to reflect this lab -->
    <meta name="description" content="this is an in-class lab using basic
      HTML tags, CSS, discussion, and w3schools.com" />
    <meta name="keywords" content="HTML, CSS, education, labs, lab3" />
    <meta name="author" content="Student Name" />
    <meta http-equiv="Content-Type" content="text/html; charset=UTF-8" />

    <!--This is a comment. Comments are not displayed in the browser. Edit line below-->
    <title>Lab 3 - Your Name Here</title>

    <link href="global.css" rel="stylesheet" type="text/css" />

  </head>

  <body id="top">
    <!--This is a comment. Comments are not displayed in the browser.-->
    <!--Use the design layout example to correctly place the DIV tags.-->
    <div id="wrapper">

      <!--This is a comment. Comments are not displayed in the browser.-->
      <!--Use your file organization example to complete the links below.-->
      <div id="navcontainer">
        <ul id="navlist">
          <li><a href="http://www.w3schools.com" />WEBSITE</a></li>
          <li><a href="enterYourRelativeAddressToLab1" />Lab 1</a></li>
          <li><a href="enterYourRelativeAddressToLab2" />Lab 2</a></li>
          <li id="active"><a href="enterYourRelativeAddressToLab3"
            id="current">Lab 3</a></li>
        </ul>
      </div>
    </div>
```

## Dreamweaver Text Editing - [global.css](#)

1. Copy/Paste/Type the next 3 pages of css and comments. Use Dreamweaver. You will need to do a **Find and Replace** to correct the quotes – notice they are now smart quotes”

@charset "UTF-8";

*/\* sets default values to zero, if not the browser will take control and add its default value \*/*

```
*{
  margin:0;
  padding:0;
}
```

*/\* adjust the paragraph's line-height to be 1.25em; (this will add space between lines) \*/*

*/\* adjust the paragraph's margin-bottom to be 1em; (this will add space between paragraphs) \*/*

```
p{
  line-height:1.25em;
  margin-bottom: 1em;
}
```

*/\* change the heading1 to be navy color \*/*

```
h1{
  color: navy;
}
```

*/\* the main shell holding all div tags \*/*

```
#wrapper{
  width: 755px;
  position:relative;
  margin: auto;
  background-color:#0FF;
}
```

*/\* top navigation div \*/*

```
#navcontainer ul{
  background-color: #036;
  float: left;
  width: 100%;
  padding-right: 32px; /* bullets are included in the padding area */
                        /* removing bullets requires padding to be added at the right */
  padding: 0; /* duplicates the default above, but fixes issues with Safari and IE */
  margin: 0; /* duplicates the default above, but fixes issues with Safari and IE */
}
```
